Darko Fan Classic Build Sheet

The pink Coffeebreak ceiling fan · a Coffeebreak design by Karen O'Brien

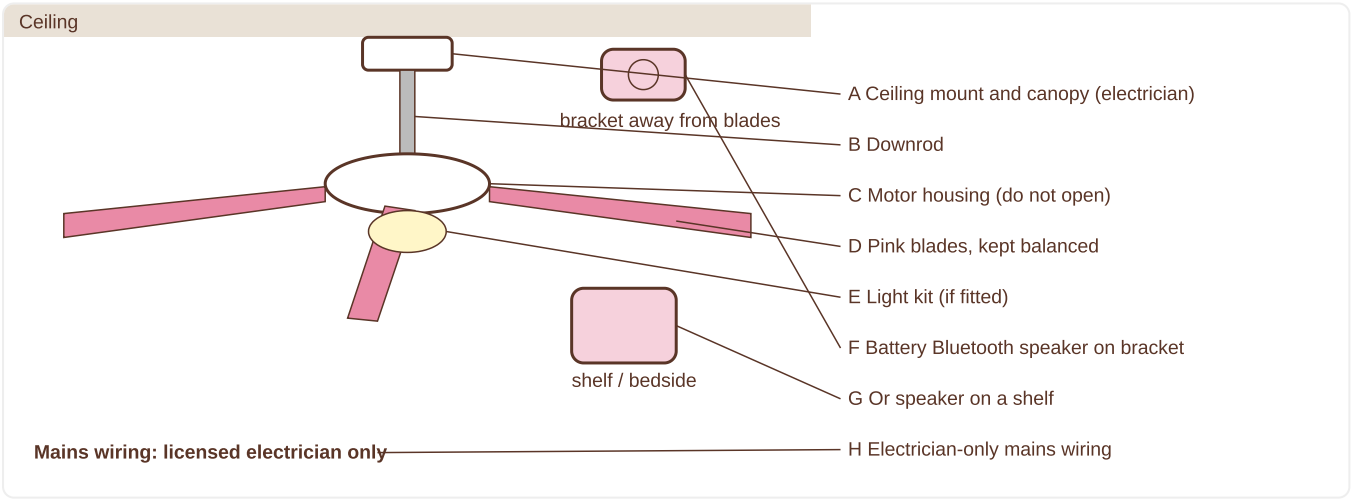

Overview

A pink-themed ceiling fan built from an existing RCM-approved ceiling fan, with a separate battery Bluetooth speaker that plays the "Wake up from Darko" alarm from your phone. The fan is bought, wired and installed as normal by a licensed electrician. The Darko styling and add-ons are cosmetic and low-voltage only.

Colours: ● Coffeebreak pink ○ White ● Cocoa brown accents

Safety first. Start from an existing, RCM-approved ceiling fan sold in Australia, used as its maker intended. In Australia it is illegal for anyone except a licensed electrician to do mains (240 V) wiring. All mains wiring, installation, mounting and any wall control or smart controller must be done by a licensed electrician, who should give you a Certificate of Compliance. Do not open, rewire or modify the fan motor or its electrics. All Darko add-ons are battery or USB powered only, and nothing is attached to the blades or moving parts. Turn the fan off at the switch before any cosmetic work, and keep the blades balanced.

Diagram

Parts list

Part (common off-the-shelf)	Qty	Price in AUD
RCM-approved ceiling fan sold in Australia (ideally one that comes in pink or with pink blade options)	1	$120 to $350 (est.)
Licensed electrician to install and wire it (Certificate of Compliance)	1 visit	$150 to $350 (est.)
Pink blade covers or pink vinyl wrap cut to identical shapes (or the maker's own pink blades)	1 set	$20 to $60 (est.)
Fan blade balancing kit	1	$8 to $15 (est.)

Rechargeable Bluetooth speaker	1	$30 to $70 (est.)
Wall or ceiling speaker bracket, fixed well away from the blades	1	$10 to $25 (est.)
Coffeebreak-style decals for the motor cover (non-moving parts only)	1 sheet	$5 to $10 (est.)
Estimated total		**About $343 to $880, including the electrician (estimate)**

All prices are estimates only and will vary by store and brand. Buy electrical items from Australian retailers and check for the RCM safety mark.

Step-by-step assembly

1. Choose an RCM-approved ceiling fan that suits your room size and ceiling height. A fan already sold in pink saves the most work.
2. If you want pink blades on a white fan, prepare the blade covers or vinyl before install. Cut all pieces to the same size so the blades stay the same weight.
3. Book a licensed electrician to mount, wire and install the fan and its wall control. Ask for a Certificate of Compliance.
4. With the fan off at the switch and stopped, fit the pink blade covers or vinyl evenly. Do not drill or modify the blades or motor.
5. Run the fan on low and use the balancing kit if it wobbles. Stop and fix any wobble before using it on high.
6. Add decals only to non-moving, non-hot surfaces such as the motor cover. Keep them off the light.
7. Fix the speaker bracket to the wall or ceiling well clear of the blade sweep, or put the speaker on a shelf. Never attach it to the fan.
8. Pair the speaker with your phone and set the "Wake up from Darko" sound as your alarm.

Care

Unplug or switch off before cleaning. Wipe with a dry or slightly damp cloth. Check blades, cage, cords and chargers now and then, and stop using anything that is damaged, hot or wobbling.
