Darko Fan Sensory Edition Build Sheet

Quiet ceiling fan with soft glow · a Coffeebreak design by Karen O'Brien

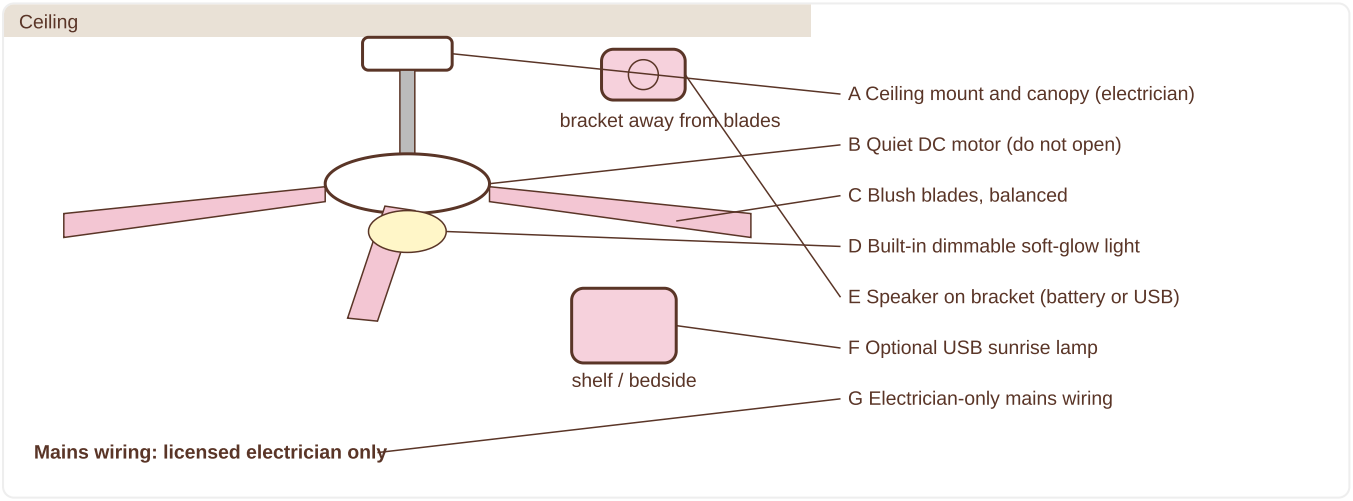

Overview

A calm-room setup built from an existing RCM-approved DC-motor ceiling fan, chosen because DC fans are usually much quieter, with a built-in dimmable LED light that fades gently. A small speaker plays a soft "Wake up from Darko" alarm by Wi-Fi or Bluetooth. Designed for people who are sensitive to noise and bright light.

Colours: Soft blush pink · Warm white · Sage

Safety first. Start from an existing, RCM-approved ceiling fan sold in Australia, used as its maker intended. In Australia it is illegal for anyone except a licensed electrician to do mains (240 V) wiring. All mains wiring, installation, mounting and any wall control or smart controller must be done by a licensed electrician, who should give you a Certificate of Compliance. Do not open, rewire or modify the fan motor or its electrics. All Darko add-ons are battery or USB powered only, and nothing is attached to the blades or moving parts. Turn the fan off at the switch before any cosmetic work, and keep the blades balanced.

Diagram

Parts list

Part (common off-the-shelf)	Qty	Price in AUD
RCM-approved DC-motor ceiling fan with built-in dimmable LED light and remote	1	$300 to $800 (est.)
Licensed electrician to install and wire it (Certificate of Compliance)	1 visit	$150 to $350 (est.)
Small smart speaker or rechargeable Bluetooth speaker with gentle alarm sounds	1	$30 to $120 (est.)
USB sunrise or soft-glow lamp for the bedside (optional)	1	$30 to $70 (est.)

Soft blush vinyl for non-moving parts, or blush blade covers cut identically, plus balancing kit	1 set	$20 to $60 (est.)
Felt or rubber pads for the speaker and lamp (reduce rattles)	1 pack	$5 to $10 (est.)
Estimated total		**About $535 to $1,410, including the electrician (estimate)**

All prices are estimates only and will vary by store and brand. Buy electrical items from Australian retailers and check for the RCM safety mark.

Step-by-step assembly

1. Choose an RCM-approved DC-motor ceiling fan with a built-in dimmable LED and a remote. Check the maker's noise rating and pick the quietest.
2. Book a licensed electrician to install and wire it, and ask for a Certificate of Compliance. Ask them to check the mount is firm, because a firm mount is quieter.
3. With the fan off and stopped, add blush vinyl to non-moving parts, or fit identical blade covers. Balance the blades on low so there is no wobble or tick.
4. Use the fan's remote to set the lowest quiet speed and a warm, low light level. Many DC fans also have a sleep or fade timer.
5. Place the speaker on felt pads on a shelf or bracket clear of the blades. Set a soft "Wake up from Darko" alarm that starts quietly.
6. Optionally add a USB sunrise lamp on the bedside, powered by a certified USB charger, for a gentle wake-up glow.
7. Test the whole routine at night: fan on quiet, light dimmed, alarm volume comfortable.

Care

Unplug or switch off before cleaning. Wipe with a dry or slightly damp cloth. Check blades, cage, cords and chargers now and then, and stop using anything that is damaged, hot or wobbling.
